

Diego Gomez

diego.gomez@polytechnique.edu | <https://www.lix.polytechnique.fr/Labo/Diego.GOMEZ/>

WORK EXPERIENCE

- **Meta** [🌐] 05/2026 - 11/2026
Research Scientist Intern California, US
 - **Incoming Internship: Working with the XR Codec Interactions and Avatar team.**
- **Adobe Research** [🌐] 04/2023 - 09/2023
Research Scientist Intern Paris, France
 - **Designed** a NeRF-based relighting framework, improving material and normal estimation, leading to a publication to **CGI 2024**.

SELECTED PUBLICATIONS

- [2026] **From Blobs to Spokes: High-Fidelity Surface Reconstruction via Oriented Gaussians**
*Diego Gomez**, Antoine Guédon*, Nissim Maruani, Bingchen Gong, Maks Ovsjanikov
Arxiv
Oriented Primitives are necessary for unbiased surface reconstruction.
- [2025] **MILo: Mesh-In-the-Loop Gaussian Splatting for Detailed and Efficient Surface Reconstruction**
*Antoine Guédon**, *Diego Gomez**, Nissim Maruani, Bingchen Gong, George Drettakis, Maks Ovsjanikov
SIGGRAPH Asia 2025 (TOG)
Introduce a Mesh-in-the-Loop (MILo) to improve mesh extraction from Gaussian Splatting.
- [2025] **FourierRF: Few-Shot NeRFs via Progressive Fourier Frequency Control**
Diego Gomez, Bingchen Gong, Maks Ovsjanikov
3DV 2025
Correlate a grid of features with the Fourier transform to avoid artifacts on 3D reconstruction on the sparse-view setting.
- [2024] **RRM: Relightable assets using Radiance guided Material extraction**
Diego Gomez, Julien Philip, Adrien Kaiser and Elie Michel
CGI 2024
Develops a radiance-guided pipeline enabling material recovery for shiny objects, achieving state-of-the-art normal estimation.
- [2025] **ZeroKey: Point-Level Reasoning and Zero-Shot 3D Keypoint Detection from Large Language Models**
Bingchen Gong, *Diego Gomez*, Abdullah Hamdi, Abdelrahman Eldesokey, Ahmed Abdelreheem, Peter Wonka, Maks Ovsjanikov
ICCV 2025
Pixel-level annotations used to train MLLMs can be exploited for both extracting and naming salient keypoints on 3D.
- [2025] **Escaping Plato's Cave: Towards the Alignment of 3D and Text Latent Spaces**
Souhail Hadgi, Luca Moschella, Andrea Santilli, *Diego Gomez*, Qixing Huang, Emanuele Rodolà, Simone Melzi, Maks Ovsjanikov
CVPR 2025
Naive feature alignment of text and 3D encoders performs poorly, but projecting onto well-chosen subspaces greatly improves alignment, retrieval accuracy, and reveals a semantic-geometric separation.

*Equal contribution

EDUCATION

- **École Polytechnique** 2024 - Present
PhD in Computer Vision and Computer Graphics Paris, France
 - Working in the GeomeriX team with Prof. Maks Ovsjanikov
 - First author publications at **3DV**, and **SIGGRAPH Asia**
 - Contributed to papers published at **CVPR** and **ICCV**
- **Institut Polytechnique de Paris** 2023
Master of Science - Mathématiques Vision Apprentissage (MVA) Paris, France
 - Supported by the PhD track **Excellence Scholarship** from Institut Polytechnique de Paris.
- **École Polytechnique** 2021
Bachelor of Science - Mathematics and Computer Science Double Major Paris, France
 - Graduated **Summa Cum Laude**, CGPA 4.0
